News > Spectralink supports ATEX DECT phones

<https://staging.spreenauten.com/funktechnik-news/19-04-2020/atex-dect-telephone-spectralink>

Gepostet am 19/04/2020 09:19

Spectralink, the renowned DECT provider, informed us today about the latest DECT portfolio release, which includes numerous improvements and new features. We are particularly excited that explosion-proof (intrinsically safe) DECT ATEX phones are now supported by fully integrated. The update of the WEBGUI has also been successfully implemented by smart.

But read for yourself:

"Our DECT portfolio Release 1 for 2020 includes the following important product improvements:

Integrated support for SRTP / TLS for both DECT (2500/8000) and IP DECT servers (200/400/6500) Native support for intrinsically safe ATEX handsets from Funktel with Spectralink IP DECT infrastructure - for use in hazardous environments

Display of LAN synchronisation power: In the Web GUI, under "Administration->Base station", a column named "LAN synchronisation power" has been added. This column is only visible if an optional LAN Sync license is loaded on the DECT server. Click [here](#) for details about this latest version."

Spreenauten GmbH for and installs DECT products in any environment and with a lot of experience.
