New Addition to Our IT Team: Najmiddin Joins Our Software Development Department

📅 09/02/2025

Already since July 2024, Najmiddin has been strengthening our IT team as a backend developer. With his deep expertise in Python, Django, and Docker, he brings valuable experience in developing high-performance web applications and a fresh perspective on our existing software solutions for Motorola DMR radio technology. Najmiddin's first focus is on a key internal project: modernizing our rental platform www.funkgeraete-vermietung.de. This platform, designed for businesses, event organizers, and industrial partners, will undergo a technical overhaul in the coming months to ensure even more efficient booking and management of Motorola radios. In addition to an improved user experience and faster loading times, new features will be introduced to automate rental processes. But this is just the beginning: Spreenauten GmbH is increasingly focusing on app development for Motorola DMR radio technology, with the goal of expanding existing communication solutions and setting new standards for integrating Motorola R7 Premium and other digital radio solutions into modern IT environments. Najmiddin will play a key role in this, particularly in the development of REST APIs and containerized applications for professional radio communication. With his experience in scalable backend systems, cloud technologies, and CI/CD pipelines, Najmiddin is a perfect fit for our development team. We look forward to upcoming projects and welcome him on board!

Spreenauten to provide state-of-the-art radio technology for the 2025 Berlinale – Motorola R7 Premium to be used for the first time

📅 01/02/2025

Once again this year, the radio equipment rental team at Spreenauten is a proud partner of the Berlinale, providing a high-performance communications infrastructure at all locations. With a combination of Motorola rental radios, repeaters, and radio cells, we ensure reliable and smooth communication behind the scenes of one of the world's most important film festivals. Curtains up and premiere for the Motorola R7 Premium at the Berlinale! We are particularly pleased to add the new Motorola R7 Premium to our rental fleet for the first time this year. This latest flagship radio from Motorola offers: Outstanding audio quality with intelligent noise cancellation – ideal for noisy festival environments. Reliable range thanks to state-of-the-art radio technology. Robust construction for intensive use on film sets, at events, and in logistics. ... making it the ideal radio solution for an international film festival. During the Berlinale, our radios are used in various areas: ☐ Technology – coordination of event technology ☐ Event logistics & security – communication between event teams, security, and ticketing. ☐ Transport & setup – coordination for smooth operations between festival locations. Spreenauten: Innovation meets radio technology Our strength lies not only in providing state-of-the-art radio solutions, but also in developing innovative software solutions. Based on the Motorola R7, we are already working on a customized dispatcher app that will enable even more efficient control and monitoring of radio communications. With our flexible rental solutions, forward-looking technologies, and individual consulting, we are the perfect partner for anyone who needs a powerful communications solution – not just at the Berlinale, but for

any type of event or production. □ Request rental radios now and benefit from our expertise! #Berlinale2025 #MotorolaR7 #RadioSolutions #Spreenauten #EventCommunication

Our rental radio equipment at the Berlinale 2024

📅 02/02/2024

Design, construction, and support of high-quality radio cells based on Motorola radio technology. Hand in hand with effective IT solutions, this has been the focus of our business activities since our company was founded. We also maintain one of the largest rental fleets of radio equipment in Europe. Here, too, we specialize in the rental of high-quality Motorola radio equipment. We are delighted to count many well-known festivals and industry customers among our long-standing business partners. These include the renowned international film festival "Die Berlinale." In 2024, the radio equipment for the Berlinale will once again come from our sub-brand "Funkgeräte-Vermietung.de," which we are very pleased about, especially since cinemas often pose a particular challenge in terms of radio technology. Our team led by Gregor, who is once again the main contact for radio equipment and radio cells at festivals this year, designed effective coverage plans during the planning phase so that we can now guarantee the best possible communication at all locations.

Captain, my captain: energy! Radio technology at the Fusion Festival 2025

📅 28/06/2025

We are delighted to announce our ongoing partnership with Fusion Festival, which has been in place for several years. We will also be deploying the complete Motorola radio communications infrastructure and on-site radio cell environment at Fusion 2025. While Spreenauten has established itself as a leading provider of industrial radio communication solutions—implementing and managing radio cell networks for global players and mid-market organizations—our deep expertise in event technology environments and our background in the club, rock 'n' roll, and festival scene are often overlooked. Large-scale events such as the Fusion Festival represent mission-critical deployments where traditional GSM-based mobile network infrastructure typically experiences significant performance degradation. In addition to multiple redundancy and the associated fault-tolerant communication channels, our radio systems maintain operational continuity even under extreme network loads with many participants. In addition to the pure DMR-based communication structure, our implementation includes comprehensive coordination systems for security, technical operations, and awareness teams. Optionally, the infrastructure includes automated workforce management capabilities—leveraging real-time positioning data to optimize resource allocation and dispatch the nearest available technician to any location requiring immediate intervention. We are delighted to be flying again at Fusion 2025 and wish all Fusionists (x/d/w/m) a truly enchanting Fusion 2025 – and a safe landing!

We want to radio your bicycle!

📅 14/09/2025

"Longerererer." That could actually be a great slogan for our new R7 batteries (and the Motorola R7 radios that go with them) — powered by Motorola's new IMPRES 2 technology, they last up to 16 hours on a single charge. Pretty amazing. Even more impressive: 226 kilometers on

...a bike — starting at the Olympic Stadium, across Berlin, and back again. Our deepest respect to everyone who took part in this year's BRV Cycling Marathon. Also on site: Funkgeräte-Vermietung.de (our radio equipment rental service in Germany), providing a fleet of Motorola radios to ensure autonomous, clear, and powerful communication — absolutely essential for any outdoor event. Radios for marathon events — whether on foot or on two wheels — remain the ultimate challenge. Fast-moving participants require flawless coordination, and this has become one of our core specialties, refined with great care over the years.

In addition to the Motorola SLR5500, we now also offer mobile range extension options to keep communication strong throughout large areas. We're always happy to advise you — free of charge — drawing on nearly 30 years of experience in professional radio communications. If you're looking to buy instead of rent, we'd love to help with that too. As a Motorola Platinum Partner and one of the largest resellers in the EU, we offer outstanding pricing and our renowned, top-tier service. Special thanks to Google Gemini for the image that captures this story perfectly.
