Two-way Radios

The sale and rental of TETRA, hybrid (analogue & digital) and digital radio equipment (digital radio, DMR) is our main focus of activity, in addition to the conception of radio technology. Specialised in Hytera and Motorola radios, we also offer programming, service, maintenance, repair and EU-wide RMA.

TETRA Radios & Radio Cells

TETRA radios & radio cells are an essential part of our range of services. This includes the sale and rental of TETRA radio technology, our RMA service (Motorola & Hytera), the maintenance of TETRA radio installations and the repair of TETRA radios and radio cells.

Atex Radios

Explosion protection (ATEX) is one of the most frequent requirements in radio technology in the industrial sector. As an ATEX partner, Spreenauten GmbH has offered the complete range of services since 1999: Sale and rental of ATEX (explosion protected) radio equipment in various protection classes, ATEX consulting & certification as well as the installation of radio cells to cover explosion endangered environments.

Battery & Charging Technology for Radios

With us your batteries are in the best hands. Besides selling and renting batteries for Hytera and Motorola radios, we also offer maintenance and testing of batteries. For this we have a Cadex battery test line with a capacity of 100 parallel slots.

Headsets & Loudspeaker Microphones

We offer the complete product range of loudspeaker microphones and headsets for Hytera and Motorola radios. This applies to third-party suppliers as well as to our own in-house production, which enables us to respond quickly and specifically to individual customer requirements. One of our highlights is our crane radio range.

DECT Phones & Repeaters (Base Stations)

DECT systems are a cheap and practical extension of an existing telephone system. In addition to the sale of professional DECT telephones and DECT repeaters (base stations), the planning and implementation of DECT projects are an integral part of our offer. Our 360° know-how in radio technology allows us to regularly guarantee synergies with existing systems and the integration of DECT systems into a "mission critical" communication structure.

Tour Guide systems

Tour Guide systems are ideally suited for communicating with larger groups of visitors (e.g. at exhibitions, in-house exhibitions, company tours). We offer the leading brands Beyerdynamic and Sennheiser for rental and sale. This includes the digital flagship model "UNITE" from Beyerdynamic...

Antennas & Antenna Technology

Spreenauten GmbH is your central contact for antennas, antenna technology as well as the planning, maintenance and implementation of complex antenna systems. Due to our own developed software for the planning of antenna systems, we are able to carry out even extensive antenna installations at short notice and guarantee the desired radio coverage...
